

Heavy-Duty CPE Shoe Covers

CPE shoe covers are designed with coated polyethylene to help protect against non-hazardous particles such as dust and dirt, as well as grime, liquids, and chemicals.

Whether working in mud, dirt, or wet areas, these shoe covers are built to withstand harsh environments. Shoe covers can be worn multiple times or until they are damaged or contaminated.

Benefits

More durable than polypropylene
CPE shoe covers are designed with coated polyethylene to protect against non-hazardous particles, liquid splash, & shallow immersion. Shoe covers can be worn multiple times or until they are damaged or contaminated.

Protect shoes and worksites
CPE shoe covers help protect wearer's shoes from dust, debris, liquids, and chemicals. They also help protect flooring and worksites from substances stuck on shoe soles.

Waterproof with textured finish
Shoe covers are waterproof with a textured finish that helps add traction and better skid resistance on a variety of surfaces.

Wide variety of applications and uses
These versatile and durable shoe covers are ideal for construction, healthcare, cleanrooms, food processing, installations, renovations, and more.

One size fits most
These shoe covers have a secure elastic top to keep contaminants out and shoe covers in place throughout a hard day's work. Shoe covers easily fit over work boots and tennis shoes, fitting up to a men's size 12.5 shoe.
